DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Embodiment 1 of Fig. 2,
Embodiment 2 of Fig. 11,
Embodiment 3 of Fig. 12,
Embodiment 4 of Fig. 15,
Embodiment 5 of Fig. 18,
Embodiment 6 of Fig. 20,
Embodiment 7 of Fig. 21,
Embodiment 8 of Fig. 22,
Embodiment 9 of Figs. 23-24,
Embodiment 10 of Figs. 25-26,
Embodiment 11 of Figs. 27-28,
Embodiment 12 of Fig. 30,
Embodiment 13 of Figs. 31-32,
Embodiment 14 of Fig. 33,
Embodiment 15 of Fig. 34,
Embodiment 16 of Fig. 35,

Embodiment 17 of Fig. 36,
Embodiment 18 of Fig. 37,
Embodiment 19 of Fig. 38,
Embodiment 20 of Fig. 39,
Embodiment 21 of Figs. 40-41,
Embodiment 22 of Fig. 42, and
Embodiment 23 of Fig. 43,

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the technical feature "a first portion for mounting a semiconductor assembly, a second portion, and a connecting portion

joining the first and second portions and arranged to allow folding of the second portion over the first portion to form a cover" is common to all claims. However, the technical feature is known in the art as disclosed by references JP 06-350012, JP 07-288332, and JP 05-166988 in IDS filed 06/16/2006. Therefore unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
